

Meat & Poultry

Total packing solution

Cabinplant packing line for fresh meat & poultry

The production line is specially designed for handling both few-piece and large portions.

The total packing solution is a 3in1 line for flexible portion sizes and multiple types of packaging, for instance 3 different types of packing methods can be handled on the same line:

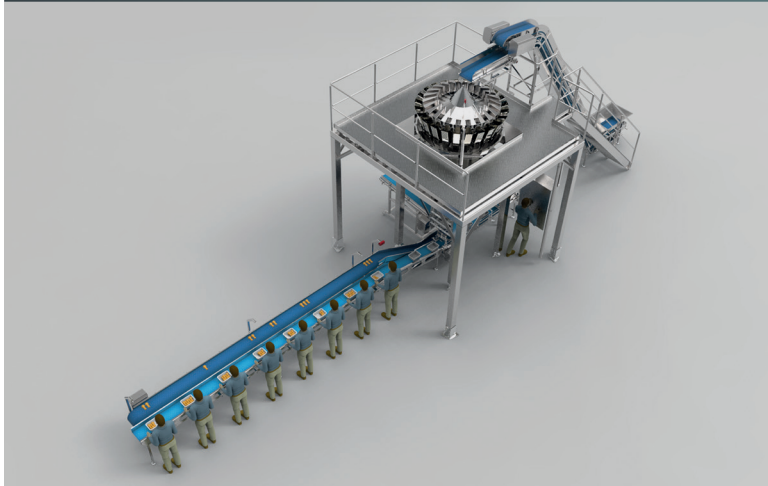

- Stationary portion packing in tray
- Side-by-side packing on the fly
- Direct filling in tray

Cabinplant®

Line packing of fresh meat and poultry

Specially designed for handling both few-piece and large portions

The line and the multihead weigher are controlled from a 15" touch screen with pre-determined recipes and settings, providing a perfect overview of the line. The ergonomic design offers optimal working conditions for the operators in terms of lifting and reaching height, and offers the possibility of natural light on operator area.

No condensation, e.g. water dripping from platforms, and no noise from machines placed above operators. Line and control are prepared for denester and magazine buffer for denester

Capacity

Volume trays/min	40-50
------------------	-------

Depending on product and portion size.

Dimensions mm

Length	15000
Height	5400
Width	3800

Dimensions may vary depending on type of use.

Advantages

- Weighing/packing few-piece portions of fixed weight
- Flexible packing directly in trays
- On the fly packing in ergonomic working environment
- Easy change-over of product, portion size and tray format
- High accuracy thanks to sensor gate technology
- Total line control

Application

Various fresh meat products:

- Poultry
- Pork
- Beef

Functionality

- Using sensor gate technology, the multihead weigher handles few-piece portions
- Open and hygienic design makes the complete line easy to clean
- Flexible distribution tool can be adapted to future demands
- Number of operators adjustable according to packing method
- Simple change-over to convert from portion packing line to automatic tray filling line
- Possibility of multiple target weights
